My Github My LinkedIn

SUMMARY

Motivated Engineering/Technology student with a strong foundation in Data Science and Software Development. Skilled in Exploratory Data Analysis (EDA), Feature Engineering, and Machine Learning, with hands-on experience building and deploying intelligent data-driven solutions. Proficient in Data Structures & Algorithms (DSA) and Full Stack Development, demonstrating versatility across both analytical and software engineering domains. Eager to apply a diverse technical skill set in a challenging internship environment to deliver impactful, real-world solutions.

TECHNICAL SKILLS

- Languages: Python, C, C++, java, javascript.
- Frameworks: Fast API, Flask
- Data Science: Pandas, NumPy, Scikit-Learn, Matplotlib, Seaborn
- Web: HTML, CSS, Tailwind , SQL
- Tools: Git, REST APIs, Model Deployment

WORK EXPERIENCE

Chief Technical Officer | Startup Company

January 2026 – March 2026

- **Led the overall technical vision, architecture, and development strategy of an early-stage startup.**
- **Oversaw full-stack development, ensuring robust and scalable product delivery.**
- **Managed and implemented REST APIs, deployment pipelines, and core backend systems.**

Social Intern | Mother Old Age Home, Hatigaon

7 July – 22 July

- **Contributed to community welfare by assisting in daily care and engagement activities for elderly residents.**
- **Developed empathy, communication, and teamwork skills through hands-on social service.**

PROJECTS

Exploratory Data Analysis | Tech: *Python, Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook*

GitHub: github.com/Biki989/Exploratory-Data-Analysis

- Performed in-depth EDA on multiple real-world datasets including Red Wine Quality, Flight Price, and Google Playstore data.
- Conducted data cleaning, missing value treatment, outlier detection, and statistical analysis to extract actionable insights.
- Generated visualizations including distribution plots, correlation heatmaps, pair plots, and box plots to communicate findings effectively.

Feature Engineering | Tech: *Python, Pandas, NumPy, Scikit-learn, Jupyter Notebook*

GitHub: github.com/Biki989/Feature-Engineering

- Built a comprehensive collection of feature engineering notebooks covering key preprocessing and transformation techniques.
- Implemented handling of missing values, outlier treatment, imbalanced data (using SMOTE), and categorical encoding (nominal, ordinal, target encoding).
- Applied feature selection techniques including correlation-based selection and Recursive Feature Elimination (RFE) to prepare data for ML models.

EDUCATION

B. TECH COMPUTER SCIENCE AND ENGINEERING **AUG 2024 - AUG 2028**

Barak Valley Engineering College, ASTU
